WE BELIEVE

We acknowledge the sovereignty and equality of all levels of Creation and support the liberation of all of Life from cycles of suffering. We believe in the power of divine sovereign creatorship endowed to us by God/Source and dedicate our life to Light and Love in service to All. We believe in conscious participation, empowering everyone to activate awakening in themselves and their community.

We recognize free will and surrender our will and desires to the higher will of the Divine. We believe in divine timing and practice trust, patience, and tolerance as we witness the unfoldment of the perfection of the Divine Plan. We believe in the potency of empowering prayer, meditation, and ritual as tools for communication with the Divine for the culmination of spiritual Light and divine wisdom.

We believe everyone has a direct connection to the Source, and no intermediary is needed. When we come together in prayer and devotion, we amplify the Light of each individuals' loving intention through our unified, heart-centered consciousness.

We seek to uplift all groups and communities so that we may celebrate our unity, diversity, and wholeness. New Earth Ascending is non-competitive and embraces an ecumenical relationship with all religions and wisdom traditions. We believe in interfaith and inter-spirituality, acknowledging the teachings of Light, Love, and Wisdom in many traditions, philosophies, and cultures. We believe that no single religion holds the keys to the Kingdom of God and the blessings of redemption are available to all people through their unbreakable innate connection to the Godhead.

We believe in the Law of Oneness and that all of Creation emanates from one Divine Source that has both masculine and feminine principles. As we heal and balance the divine masculine and divine feminine principles within us, we embody the divine androgyny of Source and Nature.

We believe that humanity and planet Earth are going through a rapid physical and spiritual transformation called by many as The Ascension or The Event. We believe this process

to be part of a higher evolutionary divine plan guided by the Source of Creation that is beyond the standard biological evolution spoken of by modern science.

We believe that we, as humanity, are awakening to our spiritual Self and are becoming a heart-based, unity-focused species with higher, multidimensional awareness, which some call Christ Consciousness, Cosmic Consciousness, or 5D Consciousness. We believe this transformation's power is happening through our DNA as the physical body transforms into a less dense body of Light with tremendously expanded multidimensional abilities.

We believe that Planet Earth, the sentient being of Gaia, will go through a similar restoration process and soon transform into a revitalized higher dimensional planet, which many are calling the New Earth. Earth changes, weather events, crumbling institutional structures, frequency fluctuations, and astrological phenomena are all signs that we are nearing that shift into the next Golden Age, where Heaven and Earth become one and all systems of control and limitation will fall away.

We believe that we are supported by benevolent ultraterrestrial and extraterrestrial beings that work in harmonic collaboration with the higher evolutionary Divine Plan of Source. We believe that soon humanity will be reunited with these benevolent beings and serve the higher evolutionary plan of the Light and Love of Source as cosmic co-citizens of the Universe working as one Family of Light.

We understand that the pathway of Self/Source-Realization and Ascension to be comprised of self-study, self-practice, self-discipline, and steadfastness. We practice self-care and self-purification to clarify our Light. We strive to grow in awareness and focused attention, practicing mindfulness in all areas of Life to grow as conscious, heart-centered creators. We choose to focus our life positively with faith and knowing that Life is evolving in perfection following the Divine Plan of the Supreme Source.

We believe in the power of intention. We practice nonviolence and non-harmfulness in intention, thought, and action. We strive to release all forms of judgment and dual thinking. We honor the sacred heart's radiant potential and believe loving compassion and understanding to be The Way. We practice the heart-centered qualities of gentleness, reverence, loving-kindness, and forgiveness as pathways to reconciliation to emulate the eternal grace of Source and our Earth Mother, Gaia.

We see that Truth is alive within each of us, and we practice inner reflection to grow in discernment for what energies are resonant with our Soul and our path. We practice benevolent truthfulness, honesty, straightforwardness, and vulnerability to embody and vocalize our truth.

We value and practice transparency and accountability, believing in the opportunity for spiritual growth through spiritual partnership with our community members. We recognize one another as divine mirrors, reflecting to us where we are in our vibration, beliefs, and intentions.

We practice sacred sexuality as an alchemical tool for divine union and Ascension. We strive to purify our intentions and desires to align with Higher Love and authentic connection. We believe in heart-based self and consensual mutual pleasure to unite body, mind, and spirit so that we may deepen in our love and authentic connection to our Divine Self, our partner(s), and Creation.

We practice contentment, acceptance, appreciation, and gratitude for our life's many blessings and lessons. We practice non-attachment, non-possessiveness, non-stealing, non-excess, and sustainability, for all we need is given to us through our alignment with our Creator Source and our connection to our Earth Mother. We practice stewardship and sustainable selfless service, acknowledging our responsibility to take care of the world around us and within.

We practice sacred commerce, investing our resources, time, and energy towards the greater good and sustainability of our community and planet. We believe in reciprocal energy exchange and strive to do so when able. We practice generosity, hospitality, and charitability as reflections of the abundance of the Universe.

We strive to embody and emulate these spiritual principles to manifest the complete liberation of all beings from cycles of suffering and to assist this Grand Transition into the New Earth.

Bless us all!
